

# LEGAL SERVICES

---

We provide the legal profession with a wide range of services, including:

- Debtor tracing - an essential precursor to successful litigation. Tenacious and imaginative enquiries, coupled with extensive database resources and international contacts, enable Keypoint to effect successful traces worldwide
- Witness Tracing - Keypoint is experienced in finding individuals who have moved and may not want to be found
- Pre-litigation - Before proceeding with litigation against an individual or corporate entity, it is important to know whether or not the subject of litigation will be able to satisfy a judgement in the client's favour.

Keypoint conducts covert investigations using an international network of databases and contacts, combined with creative research to provide detailed and factual intelligence. This enables clients to make informed decisions on whether or not to proceed with litigation and presents the opportunity to execute judgement on identified assets.

- International process serving - Process serving is carried out by Keypoint and our authorised agents in the United Kingdom and Internationally

Affidavits of Services undertaken are professionally prepared and returned to clients promptly. Our staff is familiar with any relevant changes in legislation.

We are experienced with international process serving and have served process on behalf of clients in Hong Kong, Russia, Cyprus and many other countries. Keypoint can provide affidavits sworn at a solicitors or Notary Public. We will also apostil our testimony when required by overseas courts.

- Expert witness - Our consultants can provide expert reports and testimony for judges, barristers, lawyers, law firms, insurance companies and government agencies
- Surveillance – Whether it is mobile, static, or technical (including GPS tracking) surveillance which is required, these activities are carried out by experienced personnel with a variety of motor vehicles, equipped with covert radios and surveillance cameras / video equipment. This allows the tracking of an individual's movements within the UK and abroad.
