

SECURITY

(PHYSICAL SECURITY AND INFORMATION MANAGEMENT)

It does not matter whether you are a global multi-sited corporate organisation or a small business enterprise; you should have a suitable Security Policy operating throughout your business. The aim of such a policy is to provide a secure and safe environment for everyone and to ensure that physical and intangible assets are adequately protected.

KEYPOINT CAN ASSIST YOU BY PROVIDING:

- A suitable policy document produced after a review of your existing policy, following a study of sites to ensure that the security measures are commensurate with the identified risks. This will include a review of:
 - All policies relating to security risk
 - Electronic security systems
 - Audio-visual surveillance
 - Access control
 - Intruder detection systems
 - Asset tracking
 - Physical security measures
 - Manned guarding
 - Personnel security.
- An Information Security policy, or review of your current policy, to ensure that it aligns with business, compliance and risk reduction objectives and conforms to BS7799 (ISO17799) / ISO27001
- A review of all third party security contracts, including Assignment Instructions
- An impartial security consultancy service to commerce, industry and the public sector. This includes:
 - Risk Assessment
 - Security by Design
 - Security documentation, including a suitable policy.
- Penetration Testing, both physical and information security, to test the effectiveness of your existing measures.
